April 2019

Dear Parents,

This Summer term your child will be working on the Year 3 maths curriculum. Please find below details of this terms coverage.

Objectives

- Use multiple of 5 and 10 bonds to 100 to solve additions and subtractions; add and subtract 1-digit numbers to and from 2-digit numbers
- Compare and order 2- and 3- digit numbers; count on and back in 10s and 1s; add and subtract 2-digit numbers; solve problems using place value.
- Know multiplication and division facts for the 5, 10, 2, 4 and 3 times-tables; doubling and halving
- Know and understand the calendar, including days, weeks, months, years; tell the time to the nearest 5 minutes on analogue and digital clocks; know the properties of 3D shapes
- Use money to add and subtract and record using the correct notation and place value; add and subtract 2-digit numbers using partitioning; add three 2-digit numbers by partitioning and recombining.
- Choose an appropriate instrument to measure a length and use a ruler to estimate, measure and draw to the nearest centimetre; know 1 litre = 1000 ml; estimate and measure capacity in millilitres
- Revise times-tables learned and derive division facts; perform division with remainders; choose a mental strategy to solve additions and subtractions; solve word problems
- Rehearse place value in 3-digit numbers, order them on a number line and find a number in between; compare number sentences; solve additions and subtractions using place value; multiply and divide by 10 (whole number answers); count in steps of 10, 50 and 100.
- Add pairs of 2-digit numbers using partitioning (crossing 10s, 100 or both) and then extend to add two 3-digit numbers (not crossing 1000); recognise and sort multiples of 2, 3, 4, 5, and 10; double the 4 times-table to find the 8 times-table; derive division facts for the 8 times-table; multiply and divide by 4 by doubling or halving twice

Times Tables-

Every week, usually on a Monday, your child will carry out a times tables test. This involves them trying to fill in an empty tables grid in 5 minutes. It is expected that by then end of Year 3, children know most of their times tables. Blank grids can be requested to be sent home for the children to practice with you.

Clic test-

Every week your child will continue to carry out a Clic test, which involves 10 questions that they have to work through independently. The children will be given a target area to work on at home with you. Please do work on the questions they get wrong, as it really does make a difference. A copy of the test will be sent home.

Mental maths test-

Every other week your child will be given a timed mental maths test. The 1st 10 questions allow for 5 seconds to answer and the 2nd 10 questions 10 seconds.

Many thanks for your support. Please do contact me if you wish to discuss your child's maths,

Yours sincerely,

Mr Fancourt
